AGSENSE® ICON LINK

REMOTE MANAGEMENT FOR ICON SMART PANELS

Get the link to full pivot control from anywhere.

AgSense® ICON Link is a new remote management module exclusively designed for Valley® ICON® smart panels. It provides full remote programming of control panel functions and monitoring of center pivot operations via the AgSense mobile app or through Valley BaseStation3.™ The ICON Link is delivered fully activated and processes commands at industry-leading speeds. With a robust feature set, ICON Link is the key to unlock the full potential of Valley ICON smart panels from anywhere in the world.*

Key Features

- Pivot and panel monitoring and control
- Comprehensive reporting
- Field-changeable cell modem
- Email and text alerts
- BaseStation3 and third-party API links
- Cable theft detection and pump control*
- AgSense app available on the App Store and Google Play

*Additional hardware or subscription required.

THE POWER OF KNOWING™

Complete Control & Monitoring
- Control your irrigation machine from your mobile device or desktop.
- Access real-time status of your pivot and other inputs.

Comprehensive Reports
Broad range of user-definable reports, including:
- Pump and auxiliary output run times by field or angle
- Water volume applied by field or angle
- Acres/inches applied by field or angle

Field-Changeable Cell Modem
- Replaceable daughter cards are compatible with virtually all cellular systems around the globe
- Allows change of cell carrier if module is moved to a different field not served by current carrier
- Prevents changes in cell technology, service territories or phone company mergers from making module obsolete

Email & Text Alerts
- Broad range of user-selectable text messaging and email alerts, including: Start, stop, direction change, stuck, safety, pressure, power on/off, water on/off, auxiliary on/off, low/bad battery and cable theft

BaseStation3™
- Seamless monitoring & control of pivot and control panel functions in BaseStation3

Third-Party API Links
- Current API monitoring links to multiple ag software partners, including: Ag Connections, CropMetrics, DN2K, iCropTrak, MapShots, Servi-Tech, HydroBioARS, AgriTrend, Granular Ag and Irrinet

AgSense Cable Theft Detection & Optional Pump Control
- Cable theft kit for year-round monitoring and alerts of cable theft in progress
- Auxiliary modules to fully automate control of remotely located pumps and chemigation
