

Car Park Barrier

NEW PRODUCT FROM INGAL CIVIL PRODUCTS

ZEE Park® Sentinel has been tested to the 240kN requirement of AS1170.1 for the ends of down ramps

The new ZEE Park® Sentinel barrier system is an exciting evolution of the proven ZEE Park® AS/NZS 1170.1 compliant car park barrier.

Until now, bespoke barriers were the only option for these locations. Now, with **ZEE Park® Sentinel**, there is a low-cost proprietary system available. Car parks can now be designed with ease – using **ZEE Park®** for deck perimeters and ramp sides, continuing with **Zee Park® Sentinel** at the ramp ends, or anywhere else a high-strength barrier system is required.

ZEE Park® Sentinel uses a heavier-duty version of the proven EZY Guard post profile, and is a high-strength semi-rigid system. Sentinel is tested and designed to exceed the 240kN force prescribed under AS/NZS 1170.1. This is achieved with only two anchors per post.

The ZEE Park® is designed to spring under light 'nudge' impacts, but predictably yield under severe impacts, preventing damage to the car park structure.

Integrates easily with the Ingal range of car park barriers to create a complete solution

ZEE Park® Sentinel is suitable wherever high-containment barriers are required.
