

# *Discover the Difference!*

Composite innovations for your  
new product development

**Shakespeare**

A valmont BRAND

CUSTOM  
COMPOSITES

# A powerhouse material for new product innovation

Customizable composite resins, shapes, sizes, strengths and colors

Left: Rust-proof composites are ideal for sea wall applications.

Right: Low-smoke, low-flame Shakespeare composites enhance safety, security.

Left: Tapered rod composites for rugged outdoor applications.

Right: Shakespeare composite building materials provide timeless beauty.

## Markets Served

Product engineers across many industries are discovering the benefits of integrating durable, lightweight FRP and composite structures from Shakespeare Custom Composites into their new product development plans.

### Top Applications:

- Residential construction
- Light commercial construction
- Decking and railing
- Industrial equipment
- Heat exchangers
- Transportation tunnels
- Vehicle antennas
- Automotive components
- Perimeter fencing
- Mining equipment
- Marine sea wall piling
- Umbrella structures
- Golf course equipment
- Equestrian gear
- Tool handles

## Customizable Resins

Shakespeare can customize resin formulations to provide the specified strength, flexibility, rigidity, durability, and UV-inhibitor performance for most any application.

### Resin Types:

- Polyester
- Vinyl ester
- Epoxy
- Modified urethane blends

### Low Flame, Low Smoke Additives for Many Installations:

- Underground tunnels
- Public transport stations
- Parking garages
- Air-handling equipment
- Underground office space
- Underground storage
- Temperature & climate-controlled storage facilities

Join the growing number of product engineers choosing Shakespeare Custom Composites.

# GET THE SHAKESPEARE CUSTOM COMPOSITE ADVANTAGE

- Proven performance - crafting composite products for more than 65 years.
- Custom, complex shapes available.
- Durable and strong for outstanding reliability.
- Built for tough environments.
- Non-conductive properties enhance safety.
- Resins may be pigmented and UV-protected for long-lasting beauty and performance.
- High strength and non-metallic.
- Lightweight and rust-proof, composites are a great alternative to other materials.
