

CityQuartz, when timeless becomes contemporary.

CityQuartz is inspired by the Doric columns of ancient Greek architecture. The profile of the column is made up of 16 flutes. These flutes add depth to the structure by playing with the light and shadow. The result is a timeless column that will compliment both contemporary and traditional architecture.

The overall style of the column will be depend largely on the lantern it is paired with. Traditional, contemporary, or a subtle blend of the two? The choice is yours...
