

## Evolution, bringing nature to the urban environment.

The Evolution arch is a simple interpretation of the plant theme, and should be thought of as a blade of grass. Evolution can be implemented in many different ways. Symmetry can be created by repeating the same shape down the length of a path or roadway. In contrast, a more random or "natural" look can be created by modulating the columns. This modulation is similar to wind in the grass, and will result in a much more dynamic installation.

Columns are manufactured from 6060T5 & T6 Brushed Aluminium and are formed with by cold bending. Lanterns are installed in a post top configuration.

Anodised or Powder coated finishes.

This range is designed according to standard EN40 part 1 to 6 and has obtained CE marking 1166-CPD-0006.
