

Fluance, introducing nature to the urban environment.

The Fluance arch is a simple interpretation of the plant theme, and should be thought of as a blade of grass. Fluance can be implemented in many different ways. Symmetry can be created by repeating the same shape down the length of a path or roadway. In contrast, a more random or "natural" look can be created by modulating the columns. This modulation is similar to wind in the grass, and will result in a much more dynamic installation.

100% High-Strength Steel range, incorporating 30% Recycled Steel.

High-Strength Steel S420.

No Visible Welded.

Made by cold bending.

This range is designed according to standard EN40 part 1 to 6 and has obtained CE marking 1166-CPD-0004.
