

You Can't Manage What You Can't Measure.

Get the link to full control from anywhere.

Valley® Aqua Trac gives you the power to track and measure soil moisture conditions in your fields remotely, so that you can manage your irrigation operations efficiently and effectively. The easy-to-understand user interface makes it possible to monitor and control all your Valley devices from virtually anywhere in the world.

## Key Features:

- Easy-to-use interface
- Google Maps™ built in
- User-configurable alarms
- AgSense® app available on the App Store and Google Play

## Aqua Trac benefits:

- Easily implement irrigation decisions based on soil moisture profile with the click of a button.
- Read nearly every major soil moisture probe brand, including AquaCheck, Sentek, Decagon and Watermark.
- Data is pushed directly to easy-to-read graphs on the AgSense dashboard.
- View moisture conditions on AgSense.com or with the AgSense app on a smartphone or tablet.
- Take the guesswork out of subsurface soil moisture content to prevent irrigation mistakes, saving time, water and money.
- Keep fertilizer and crop protection chemicals in the desired root zone to prevent ground water contamination.
- Automatically share results with your agronomy partners in simple electronic graphs and charts.
- Keep tabs on root zone activity, and use irrigation rate and timing to optimize root development.
- Available through multiple AgSense agronomic partners as part of their irrigation management program.
- Aqua Trac Pro reads a digital capacitance probe and/or Watermark sensors, drip pressure transducer, flow, temperature, rainfall and tank/pond levels.
