

## Advanced Control Technology

### Total Control – Anywhere

Valley® BaseStation3™ gives you unprecedented control over your operation. Select cellular, data radio or Internet protocol to manage and control all your irrigation equipment from any smartphone, tablet or desktop computer.

### Beyond the Ordinary

- Native iOS (iPhone, iPad) and Android apps
- Google Maps™ integration
- Destination ETA calculates how long it will take a machine to reach a specific point in the field
- Soil moisture view shows soil moisture content by layers
- Operational view allows you to see what each machine is doing
- Advanced data exports (applied water, equipment, etc.)
- End gun templates for quick and easy setting changes
- Tiered levels of access and security for designated users
- Allows multiple and simultaneous users
- Provides alert notifications and instant, at-a-glance status updates

Apple® and iPad® are registered trademarks of Apple Inc., registered in the U.S. and other countries.

## Go Mobile with BaseStation3

- Native apps available for iOS and Android devices
- Monitor and control devices from anywhere
- Access alarms and status updates in real time
- Stay up to date with text, email or push notifications
- Manage Cruise Control™ and step programs
- Easily adjust end gun settings

See for yourself how much easier irrigating can be.
