

LATTICE TOWERS: PROVEN STRUCTURES, UNEQUALED SERVICE

At Valmont® Utility, our solutions-based approach has helped us become a global leader in engineering, offer a variety of structural shapes and materials, and build the biggest footprint in the industry. Our goal is to always provide the right solution to any problem by offering the broadest array of customizable options, including lattice towers.

We're doing more than just offering lattice towers. We're changing the game, taking extra steps to simplify construction. More importantly, we're offering you unprecedented service and support from our facilities based around the U.S. Lattice towers from Valmont Utility are backed by:

- **Global Engineering Excellence**—The engineers at Valmont Utility have a well-earned reputation across the globe for leadership in the design of structures of all types.
- **World-Class Project Management**—Our U.S.-based project managers guide the development of your lattice solutions, ensuring they meet your goals, budget and timeline. The plant is ISO 9001, ISO 14001, and OHSAS 18001 Certified.
- **Regional Support Network**—Our network of facilities across the U.S. means that replacement components, as well as the field professionals to support your lattice towers, are nearby and always available.
- **Kitting Assurance**—Every nut, bolt and component of your lattice tower has been test fitted before being put into the kit, to ensure the towers can be constructed quickly and easily.
- **Concise Labeling**—We put a premium on the clear and accurate labeling of each part. It's the best way to ensure efficient construction with minimal downtime in the field.
- **Modern Manufacturing**—Our lattice tower manufacturing facility is AWS and CWB Certified, and sets a new industry standard with CAD/CNC technologies, prototyping every tower for proof of fit, and the 100% traceability of every tower component.
- **Extending Tower Life**—Valmont Utility offers a complete line of coatings and finishes to help you get more from the investment in every lattice tower.

Offering the industry's best lattice towers is about more than structures, it requires a service and support network that is near you and the customers you serve.

THE LATTICE ADVANTAGE

Every line is unique, with its own set of opportunities and challenges. Lattice towers are the ideal solution for unique terrain requirements, wide spans or large loads. And, you also benefit from:

- **Lightweight Strength**—The structural design and engineering of lattice towers provide a lightweight solution, especially when compared to their relative strength.
- **Ease of Construction**—Lattice towers are pre-packaged, using bundling and kitting, to ensure they are cost-effective to ship, simple to construct and minimize field downtime.
- **Cost Effectiveness**—Lattice towers are less expensive to purchase and ship, especially to remote locations.
- **Proven Reliability**—Lattice towers have proven their resiliency over many decades and in every corner of the world.

For Valmont Utility, offering the industry's best lattice towers is about more than structures, it requires a world-class service and support network near you and the customers you serve. Offering lattice towers is another example of what we mean when we say Engineered to Perform. The Capacity to Deliver.™
