

Flexfence TL3 End Terminal - Data Sheet

NCHRP350 COMPLIANT

Wire Rope Safety Barrier End Treatment

Specification

- NCHRP 350 Test Level 3 (TL3) Compliant
- The only TL3 end terminal proven NOT to release end ropes in crash testing for approach impacts
- Safest end terminal on the market - Non release capability retains ropes for secondary impacts
- Length of terminal – 12m
- Point of need – 12.6m from anchor point
- Post spacings – 1m centres
- Posts are hot dip galvanized and can be powder-coated to a variety of colours
- Machine swaged fittings for added durability and safety

How the FLEXFENCE TL3 End Terminal Works

The Flexfence TL3 Terminal is designed to provide a soft gating impact preventing vehicles from launching or snagging. The terminal comprises shortened posts at 1m spacings reducing the angle at which the cables are terminated, thus minimising the potential for vehicle rollover.

Application Benefits

- Can be retrofitted to existing installations
- Proven NOT to release the cables during crash testing, ensuring the system remains tensioned and functional against secondary impacts occurring downstream of the anchor
- Uses standard Flexfence components minimising product inventory
