

Purchasing a Center Pivot To-Do List

- Talk with your local NRCS to determine if installing an irrigation well is permitted, as well as if you have enough available water to pump through a center pivot or linear.
- Create a list of the crops you plan to grow and plan the rotation cycle.
- Research online different mechanized irrigation product options and dealerships nearest you.
- Make initial contact with your dealer and make an appointment to visit the dealership.
- Ask your dealer what materials you will need to bring with to the dealership.
- Talk with your local Valley dealer about the following:
 - Soil and water sampling
 - Per-acre development costs
 - Optimum machine requirements for your field(s)
 - Available aftermarket, service, and maintenance programs
 - Machine and parts warranty
 - Estimated return on investment
 - Financing options
- Talk with a financial advisor about the investment.
- Make your decision!
