

WIRELESS TOWER ANALYSIS INFORMATION DOCUMENT

for existing Valmont[®], PiRod[®] and Microflect[™] Tower Installations

For your convenience, you may use the following Tower Analysis Information Sheet to compile the information.

- **Tower Loading** – Send a list of the existing and proposed antennas, mounts, transmission lines and any other appurtenances (e.g. lights, conduit, lightning rod extenders, ladders, etc.) you want considered in the study. The more information we have, such as detailed photos, exact antenna models, dish azimuth, transmission line layout, the more accurately and less conservatively we can analyze the tower. This may reduce modifications to the tower.
- **Purchase Order** – A purchase order is required to initiate a study. If we do not have credit terms established with your company, you may pay in advance by check, credit card or submit a credit application. Note: credit terms must be approved before initiation of the study.
- **Letter of Authorization** – We must receive a letter from the current tower owner authorizing us to perform the study and release information to the requestor. A copy of the report along with the proposal for modification materials will be sent to the tower owner.

Tower Analysis Information

Please submit this request and tower loading with a purchase order and a letter from the tower owner authorizing us to release information to you. Submit the document online; fax to 574-936-4567; or e-mail to tas@valmont-towers.com.

Tower Identification

Engineering File # _____ Tower Drawing # _____

Site Name/Location (city, county, state) _____

Type: Self-Supporting Guyed Monopole Model _____ Height _____

Wind Speed Check here if you would like the wind speed reduced to the minimum required, in case modifications are needed for a higher original design wind speed.

Special Instructions

Analysis Contact

Name _____ Company _____

Address _____ City _____ State _____ Zip _____

Phone _____ Fax _____ E-mail _____

NOTE: If you are not the tower owner, request a letter or e-mail from the owner authorizing us to release information to you and fax to 574-936-4567 or e-mail to tas@valmont-towers.com. The owner will receive a copy of the analysis results. The analysis will not be released without the owner's permission.

Tower Owner (same as contact)

Name _____ Company _____

Address _____ City _____ State _____ Zip _____

Phone _____ Fax _____ E-mail _____

Bill To (same as contact; same as owner)

Name _____ Company _____

Address _____ City _____ State _____ Zip _____

Phone _____ Fax _____ E-mail _____

I hereby authorize Valmont to analyze the tower and I agree to pay the fee for engineering services by means of

Purchase Order Number _____ **or Check Number** _____ **Date Mailed** _____

For your convenience Visa, MasterCard and American Express are accepted. Please call to pay with a credit card.

Please submit this signed request and tower loading with your payment method and a letter from the tower owner authorizing us to release engineering information to you. Fax to 574-936-4567 or e-mail to tas@valmont-towers.com.
