

Field Commander®

Remotely monitor and control your irrigation.

The industry-leading Valley® Field Commander® incorporates patented GPS technology to remotely monitor and control irrigation systems from web-connected smartphones, tablets and computers. Installed on more pivots than all other brands units combined, it provides real-time information and up-to-the-minute alarms via email or text messaging.

Key Features

- Compatible with center pivot and linear machines
- Manage a mixed fleet of hydraulic and electric pivots
- Economically provides the functionality of a digital panel while still working with any brand or vintage of mechanical panel
- Cable theft monitoring and alerts without power
- Comprehensive management and irrigation district reports
- AgSense app available on the App Store and Google Play

Field Commander benefits include:

- Save time and money by turning a smartphone, tablet or desktop computer into a virtual control panel that can monitor and control from anywhere in the world.
- Manage a mixed fleet of hydraulic and electric pivots, bringing them to a single web dashboard when used in combination with the Valley Field Commander for hydraulic pivots.
- Industry-leading mobile app includes: Quick Start, Map View, Graphical Table Editor, Auto Restart, Active and Recent Commands and Reports and Graphs.
- “Remote Speed Override” feature allows the panel percent timer to easily override web-programmed speeds for planting, spraying, harvesting, etc.
- Set machine speed by choice of: Percent Timer, Pivot Angle, Application Rate, Hours per Revolution, or Hours to Stop Angle.
- Single or Dual Stop-In-Slot (Stop Angles).
- Auto Restart by software, not panel equipment.
- Crash Zone/Overlap Alerts help avoid machine collisions.
- Program multiple Timed Start and Timed Stop Commands.

Listed features are not compatible with all machine configurations.
